The data on population are derived based on Population Censuses.

The current estimate of population number is produced on the basis of the last population census results, plus annual number of live births and arrivals, minus number of deaths and departures from the given territory.

The current estimate of population number for the intercensal period has been verified through making retrospective recalculation based on the last population census results.

The distribution of population by urban/rural breakdown is made by their place of residence (registration). Urban settlements are considered those which are determined as cities/towns by RA Law “On RA Administrative-territorial Distribution”, and all other settlements determined as villages are considered rural.

Two categories of population are taken into account during population census, they are as follows:

- De jure population number of population of the given territory covering permanent residents including those present and temporarily absent during the registration,
- De facto population, number of population of the given territory covering permanent residents including those present and temporarily residing during the registration.

The temporarily absent population are those individuals who were registered as residents but were absent less than 12 months from the place of their main (permanent) residence as of the census time.

The temporarily present population are those individuals who were not residents and were present in the given territory less than 12 months as of the census time.
Able-bodied age population was 16-59 years old for males and 16-54 years old for females until 01.01.1997, and from 01.01.1997 it was 16-60 years old for males and 16-55 years old for females, from 01.01.1999 it was 16-61 years old for males and 16-56 years old for females, as of 01.01.2001 it became 16-62 years old for males and 16-57 years old for females, as of 01.01.2002 it had been 16-62 years old for males and 16-58 years old for females due to the legislation in force for appropriate periods.

Able-bodied age population since 01.01.2003 were 16-62 years of males, and of females: for 01.01.03-01.01.04 - 16-58, for 01.01.05-01.01.06 - 16-59, for 01.01.07-01.01.08 16-60, and for, 01.01.09 - 16-61 years.

Demographic dependency ratio is calculated as a ratio of population at the age 0-15 and 60 and over to population aged 16-59 years.
