

Quality declaration **Turnover indices of services by types**

0 General information on statistical product		
0.1	Name	Turnover indices of services by types
0.2	Subject area	Services
0.3	Responsible Authority, Office, Person, etc.	Ms. Anahit Harutyunyan Head Trade and Other Services Statistics Division Armstat 3 Government house, Republic Avenue Yerevan, 0010, Republic of Armenia Telephone: +374 11 587 623 E-mail: anahit@armstat.am , info@armstat.am
0.4	Purpose and History	The main purpose is to provide updated information on index of services volume. The calculation of this indicator has a long history and has been maintained since 1920's.
0.5	Users and Application	The main users of statistical information are the state government and local self-government bodies, public, scientific-educational, financial organizations, business society, mass media, international organizations, etc. The indicator "turnover index of services by types" is applied in the field of services for the purposes of strategy development, solutions of strategic tasks, analysis of business environment, revealing social development trends and other purposes.
0.6	Information Sources	The information source for the calculation of this indicator are information collected from legal persons and individual entrepreneurs by statistical reporting form on monthly and quarterly basis on the volume of services.
0.7	Legal Authority to Collect Data	The data are collected based on the Law on "Official Statistics" and "Five Year Statistical Program", as well as the Resolution No. 05-N of RA State Council on Statistics "On Approval of the Procedure for the collection of statistical data" dated 20 June 2016 and Resolution "On Approval of Annual Statistical Program".

0.8	Response Burden (Primary information providers)	The response burden is not measured.
-----	---	--------------------------------------

1 Content

1.1	Description of content	<p>The Index method is very important in terms of dynamics analysis of the indicator of turnover indices of services by types. Two indices are applied for the calculation of the indicator:</p> <ul style="list-style-type: none"> • the index of services value volume (at current prices) • the index of physical volume of services (at comparable prices) <p>The index of services volume value at current prices defines the change of services volume at the account of two factors: price change and change of the sold services.</p> <p>This index is calculated by dividing the value volume of the reference period services by the value volume of base period services (at current prices) which is as follows:</p> $I = (O_1 / O_0 \times 100), \text{ where,}$ <p>O_1, O_0 – are the value volumes of services for the reference and base periods at current prices accordingly.</p> <p>The physical volume index of services shows how the volume of services changes by excluding the influence of the price change.</p> $I_{\Phi O} = (O_1 / I_{\mathcal{D}} \times 100) / O_0, \text{ where}$ <p>$I_{\Phi O}$ – physical volume index of services,</p> <p>O_1, O_0 – are the value volumes of services at current prices for the reference and base period accordingly.</p> <p>$I_{\mathcal{D}}$ – Consumer Price Index (CPI) for products in comparison of reference period with base period.</p>
-----	------------------------	---

1.2	Statistical concepts	<p>Basic concepts</p> <p>The services are considered to be different activities implemented by the producers upon the consumers' request, which usually results in the change of situation of the units receiving the services.</p> <p>The production of services and their provision to the consumers are usually implemented in parallel and these processes are inseparable.</p> <p>The calculation of all types of services is implemented for the period, during which the services have been rendered regardless of the payment according to the registration principle.</p> <p>The total volume of services includes all types of taxes, except the VAT and other indirect taxes.</p> <p>The volume of services does not include all those interest rates, fines and penalties, which have occurred in the result of not payment for services or paying them not in a timely manner.</p> <p>The services, as a rule, cannot be like material objects, which have the title of ownership. The services are not subject to transportation. Direct cooperation between service provider and consumer is necessary for all cases (for instance, the residence, hairdressing services, etc.). The buyer's demand for such services' sale and purchase is satisfied directly at the moment of services provision.</p> <p>Some types of activity are usually considered as services, but in practice they have features of goods, and have title of ownership. For example, the activity of informational and cultural products production and dissemination (creation of informational programs on different themes, preparation of news programs, development of consulting and software, movies, musical programs production, etc.), except, the activity of copying the polygraph and written disk drives. The products of the aforementioned sectors are stored on material</p>
-----	----------------------	--

		<p>disk drives: paper, magnetic disks, CD-s, etc.: they can have title of ownership. The volume of such services expressed in values, at current prices is considered as service rendered and used within the same period.</p> <p>Armenian Classification of Types of Economic Activity adopted by the Minister of Economy of the Republic of Armenia by the order number 874-N, dated 19.09.2013, registered in the Ministry of Justice of the Republic of Armenia on 24.10.2013 (state registration number: 10313406) and published in departmental normative acts journal of the Republic of Armenia number 30 (474).1 dated 04.11.2013 and includes, as follows:</p> <p>I – “Residence and organization of restaurants, cafes”,</p> <p>H - “Transportation and warehouses”,</p> <p>J - Information and Communication”,</p> <p>K – “Financial and Insurance 5Activity”,</p> <p>L - “Real Estate Activity”,</p> <p>M - «Specialized, Scientific and Technical Activity”,</p> <p>N - “Administrative and Auxiliary Activity”,</p> <p>P - ‘Education”,</p> <p>Q - “Healthcare and Social Service of Population”, R - “Culture, Entertainment and Recreation”,</p> <p>S - “Other Services” sections.</p> <p>Geographic Coverage</p> <p>All Armenian marzes and Yerevan city are included.</p>
2 Time		
2.1	Reference period	Monthly
2.2	Date of publication	The monthly timely data are published on the 25 th day of the reference period, the first monthly publication on the 35/36 th

		day following the reference period.
2.3	Punctuality	Data is published in accordance with the schedule of publications according to annual programs and no delay from the scheduled date has been reported.
2.4	Frequency	Monthly
3 Accuracy		
3.1	Overall Accuracy	The data on services volume is collected from all economic entities (legal entities and individual entrepreneurs) by widespread method while in the case of financial and information technology services from state bodies owned administrative authorities. The business register permanently updating base is serving as a basis for the database update. Data from large and medium size shops and other trade objects is collected monthly whereas from small ones quarterly. For the formation of population of small size economic entities for quarterly data collection their distribution (by statistical purposes, by the volume of average annual revenues) is serving as a basis.
3.2	Sources of Inaccuracy	The provision of incomplete answers by information providers during the observation may be source of inaccuracies. The accuracy of data provided by the companies for previous year (at current prices) is compared with the relevant data provided during last year for the same reference period.
3.3	Measures on accuracy/ Measurability	The response burden is about 97%.
4 Comparability		
4.1	Comparability over Time	Before 2005, the indicator has been represented in accordance with the structure of All Union Classification of Branches of National Economy (AUCOBONE). Since 2005, the indicator has been represented according to Armenian Classification of Types of Economic Activity (developed on the basis of Classification of Types of Economic Activity (NACE) approved by Eurostat, according to which the indicators of 2001-2004 have been recalculated. Since 2010, NACE rev. 2 is being

		applied.
4.2	Comparability with Other Statistics	There is comparability with statistics from other sources.
4.3	Coherence between Provisional and Final Statistics	<p>The first publishing of the data is considered the primary one. The revisions of the published data are presented with explanatory notes.</p> <p>The primary data is reviewed according to the adjustments and other corrections submitted by economic units. The final data is presented in annual publications.</p>
5 Accessibility		
5.1	Forms of Dissemination	<p>Publications</p> <p>Monthly Publications</p> <p>“Main Macroeconomic Indicators of Social Economic Situation of the Republic of Armenia” (Armenian, Russian, English)</p> <p>Annual publications</p> <p>«Statistical Yearbook of Armenia» (Armenian, Russian, English)</p> <p>«Armenian Marzes and Yerevan City in Figures» (Armenian, English) statistical book</p> <p>«Armenia in Figures» (Armenian, English) statistical book</p> <p>Other</p> <p>«Trade and Services in the Republic of Armenia” (Armenian, Russian and English) statistical book is published every five year</p> <p>Databases</p> <p>http://armstatbank.am/pxweb/hy/ArmStatBank/?rxid=602c2fcf-531f-4ed9-b9ad-42a1c546a1b6</p> <p>Internet Address</p> <p>The publications are available in electronic format on the web</p>

		in Armenian (full version), Russian and English via the following address: https://www.armstat.am/en/?nid=82
5.2	Basic material: Storage and Usability	<p>The collected statistical reports from the respondents are kept both in paper and electronic forms. Electronic databases include:</p> <p>For Legal Persons:</p> <ul style="list-style-type: none"> a/ Legal Person's Code b/ Tax Payer's Registration Number c/ State Register Registration Number d/ Full Name of the Legal Person e/ Organization Legal Form f/ Legal Address of the Legal Person (Postal Address), phone number, as well as (voluntary for respondents) information about fax number and e-mail address g/ Main Activity Type h/ Volume of services (without VAT or excise tax) i/ Average annual Number of Employees. <p>For individual entrepreneurs</p> <ul style="list-style-type: none"> a/ Name, Surname b/ Tax Payer's Registration Number c/ State Register Registration Number d/ Home Address e/ State Registration Address (in case if it does not correspond to home address), phone number, as well as (voluntary for respondents) fax number and e-mail address

		<p>f/ Main Activity Type</p> <p>h/ Volume of services (without VAT or excise tax)</p> <p>i/ Average annual Number of Employees.</p>
5.3	Documentation	Information is available under the General Statistical Business-Process Model at https://www.armstat.am/en/?nid=672 .
5.4	Other information	<p>More detailed information about the calculation of the services volume can be found in Annexes 1 and 2 approved by the Resolution number 13-N of State Council on Statistics of RA dated 19 October 2018 “On Volume of Services Form 1- services (monthly) statistical reporting form and instructions for completion and on losing the force of Resolution N 12-N of State Council on Statistics of RA dated 14 July 2017, as well as in annexes 1 and 2 approved by the Resolution number 11-N of State Council on Statistics of RA dated 19 October 2018 “On Volume of Services Form 1- services (small) (quarterly) statistical reporting form and instructions for completion and on losing the force of Resolution N 13-N of State Council on Statistics of RA dated 14 July 2017.</p> <p>There are also methodological explanations in the “Statistical Yearbook of Armenia”, “Socio-Economic Situation of the Republic of Armenia” quarterly editions of monthly informational reports, as well as in the relevant thematic publications.</p>
