

Quality declaration **Realization (Use) of Agricultural Product by Directions**

0 General information on statistical product		
0.1	Name	Realization (Use) of Agricultural Product by Directions
0.2	Subject area	Agriculture, forestry, fishing
0.3	Responsible Authority, Office, Person, etc.	Mr. Arsen Avagyan Head Agriculture and Food Security Statistics Division Armstat 3 Government house, Republic Avenue Yerevan, 0010, Republic of Armenia Telephone: +374 11 524 449, +374 11 564 672 E-mail: arsav@armstat.am info@armstat.am
0.4	Purpose and History	To provide users with up to date data (information) on the realization of agricultural products by directions. The calculation of indicators has been maintained since the 90-s of the 20th century. It has been regularly improved throughout the years to ensure the comparability with international classifications, composition and of indicators and other standards.
0.5	Users and Application	The main users of the statistical information are the state government and local self-government bodies, public, scientific-educational, financial organizations, business society, mass media, international organizations, etc. Information on the realization of agricultural products by directions is applied for the purpose of strategy development in the mentioned field (agriculture), analysis of business environment and solutions of strategic tasks, to reveal the tendency of changes in agricultural infrastructures, for the calculation of food balance and other purposes.
0.6	Information Sources	The main information source that is being used is the data collected on an annual basis from 12090 farms.
0.7	Legal Authority to Collect Data	The data are collected based on the Law on "Official Statistics" and "Five Year Statistical Program", as well as the Resolution No. 05-N of RA State Council on Statistics "On Approval of the

		Procedure for the collection of statistical data” dated 20 June 2016 and Resolution “On Approval of Annual Statistical Program”.
0.8	Response Burden (Primary information providers)	The response burden is not measured.
1 Content		
1.1	Description of content	The realization of agricultural products by peasant farms by different directions, the realization of the products produced during the current year and the leftover agricultural products from the previous year by different directions: sold, bartered, and paid in kind for other services, used by the household, including processes and the remaining products.
1.2	Statistical concepts	<p>Basic Concepts</p> <p>Leftover agricultural products are the volume of the leftover agricultural products produced by the peasant farm during the previous year.</p> <p>Agricultural products of the current year are the volume of the main products produced by peasant farms: of which plant growing (grains, potatoes, fruits, grapes, vegetables, water-melons) and husbandry (meat, milk, eggs, wool, etc).</p> <p>Agricultural products sold to the state or other consumers is the of the agricultural products sold to the state organizations, private farms, individuals directly from the farms, in the markets, on the roads and elsewhere in cash or in kind.</p> <p>Bartered products Exchange of agricultural products produced on the farm for material resources (fuel, fertilizers, etc.) or industrial products.</p> <p>Exchange of agricultural products for hired labor and other services is the volume of all agricultural products produced on the farm which were exchanged for hired labor or other services.</p> <p>Agricultural products consumed by the peasant farms the volume of agricultural products consumed by the peasant farm</p>

		<p>or given to the relatives, neighbors, friends, etc, free of charge.</p> <p>Reprocessed agricultural products is the volume of the agricultural products produced on the farm for the purpose of reprocessing (grains- flour; from fruits and grapes – wine and vodka, vegetables-canned fruit, meat-sausages, etc, milk-cheese, butter, etc.).</p> <p>The leftover products are the agricultural products that have remained unrealized at the end of the year by separate products (for the reprocessed products initial weight is considered).</p> <p>Branch Coverage</p> <p>The statistical data cover types of activities involved in NACE rev. 2 (group A) (Agriculture, Forestry and Fishing).</p> <p>Geographical Coverage Covers all RA marzes.</p> <p>Groupings for Publication</p> <p>The data are published by the main types of agricultural products.</p>
2 Time		
2.1	Reference period	Annual
2.2	Date of publication	Annual data are published in the 2 nd quarter of the year following the reference period (in April).
2.3	Punctuality	Data are published according to schedule of annual programs publication and no delays from defined deadlines have been recorded.
2.4	Frequency	Annual
3 Accuracy		
3.1	Overall Accuracy	<p>There are no specific quantitative evaluations related to the overall accuracy.</p> <p>Representative sampling is used for data collection. Data is collected from 12090 farms (annual). The data is aggregated on</p>

		<p>the marz level.</p> <p>The response level is 98 %.</p>
3.2	Sources of Inaccuracy	Sampling is used for data collection. Information is collected on an annual basis.
3.3	Measures on accuracy/ Measurability	The accuracy of the data for each product is compared with the relevant data provided during the last year for the same reference period.
4 Comparability		
4.1	Comparability over Time	<p>Before 1998, the indicator has been represented in accordance with the structure of all union classification of branches of national economy (AUCOBONE). Starting from 1998-2001 the international standard industry classification (ISIC) rev.3 has been implemented (UN).</p> <p>Since 2002, the indicator has been submitted in accordance with Armenian Classification of Types of Economic Activity (developed on the basis of Eurostat Classification of Economic Activities (NACE). Since 2010 NACE rev. 2 is applied.</p>
4.2	Comparability with Other Statistics	There is a comparability with statistics from other sources; (for example-statistical reporting Form 29- AGR (annual)) “Sown area of agricultural crops, multiannual plant area, gross harvest and average yield”, information collected from 12090 farm holdings included in the field of sample survey of agriculture statistics.
4.3	Coherence between Provisional and Final Statistics	The final data are provided in annual publications.
5 Accessibility		
5.1	Forms of Dissemination	<p>Publications</p> <p>Annual publications</p> <p>“Realization (Use) of Agricultural Product by Peasant Farms” information bulletin (Armenian, English).</p> <p>Databases:</p>
