National Accounts of Armenia 2016
Annual and quarterly data

Statistical handbook
The discrepancy between the totals and sum of components in some cases can be explained by using rounded data.

In present day world which is characterized by the information variety and intensity of informational flows, the possible “combination” of three participants of official statistics such as respondents, users and taxpayers, “occupying the angels of statistical triangle” having different dispositions, is of great importance, especially from viewpoint of perception requirements “communication skills leveling” by national and international levels.

The National Statistical Service of RA (NSS RA) would like to thank all the respondents who have supplied information for this statistical publication and, from the above mentioned considerations, welcomes any comments and suggestions from the respondents and taxpayers, as statistical users, for the future developments of statistical publication.

You are kindly asked to provide your comments and suggestions to the Statistical Information Dissemination and Public Relations Division of NSS RA for the further improvement of publications.
