of the Republic of Armenia**

Marzes (Regions) of the Republic of Armenia in Figures 2002-2006

Statistical handbook

Yerevan - 2007

In present day world which is characterized by the information variety and intensity of informational flows, the possible “combination” of three participants of official statistics such as respondents, users and taxpayers, “occupying the angels of statistical triangle” having different dispositions, is of great importance, especially from viewpoint of perception requirements “communication skills leveling” by national and international levels.

The National Statistical Service of RA (NSS RA) would like to thank all the respondents who have supplied information for this statistical publication and from the above mentioned considerations welcomes any comments and suggestions from the respondents and taxpayers, as statistical users, for the future developments of statistical publication.

You are kindly asked to provide your comments and suggestions to the Statistical Information Dissemination, Marketing and Public Relation Division of NSS RA concerning the future development of the publications.

Marzes of the Republic of Armenia in Figures, 2002-2006

Statistical handbook

The given handbook is the most complete statistical publication of the National Statistical Service of RA, reflecting socio-demographic and economic situation of the country by marzes for 2002-2006.

Since 1995, the republic has been divided into 11 marzes, including Yerevan with a marze status.

There are 47 cities and 951 villages in the Republic of Armenia, 9 of which are included in the urban communities and the rest of villages (870) – in rural communities.

By this publication it was made attempt to present to statistical information user detailed statistical information by marzes (regions).

The handbook is foreseen for the wide cycle of readers.

Certain indicators published in the past are adjusted in the given publication.

Explanations of symbols

-	Category not applicable
...	Data not available
0.0	Negligible magnitude
✧	Data are adjusted

The discrepancy between the totals and sum in some cases can be explained by using rounded data.
